On October 6th, 2021, San Francisco Taiwan Trade Center holds the Taiwan National Day celebrations banquet at Crowne Plaza Hotel. 500 VIP guests representing government institutions, business cooperation, technology companies, and education organizations join the event. Taiwan ACE Biotek receives a special invitation to display the antiCOVID19 products, Wallie Screen AI Rapid Temperature Screening System, and O-Ring Automatic Hand Sanitizer Dispenser. At the entrance of the dining hall, we exhibit the epidemic prevention results.

Since the epidemic outbreak, the antiCOVID19 products have been successfully implementing in many government institutions, universities, technology companies, hospitals. The products were launched and manufactured by ACE Biotek originally. ACE Biotek delivers the all-in-one epidemic prevention system with “contactless, accurate, fast” competitive advantages. Wallie Screen can do at least 10-30 people dynamic detection in 0.5 seconds. If the temperature is over 37.5°C, it will have an audio alarm, screenshot, and video recording to help the users traceback. Besides, the updated functions are mask screening, facial recognition, and people count. For hospitals, we make the integration with patient’s insurance cards to trace medical or travel history. The O-Ring dispenser uses the patented infrared sensor to provide precise spraying. With the impact buffer, fallen of it can be avoided.

ACE Biotek has COVID19 prevention experience in the global market such as the USA, Hawaii, Japan, and the South Asia countries. In San Francisco, more than 70% of people have got the vaccination. Overall, the vaccination rate is over the average rate of 50% in the United States. However, how to conquer the variant virus or in the winter will be the other challenge. To assure the event goes well, guests need to provide the vaccination card and undergo temperature screening before entering the venue. ACE Biotek antiCOVID19 category plays the necessary parts by detecting the temperature and face mask and cleaning the hands at one time. The people no need to worry about the infection control breach.

After experiencing the antiCOVID19 products, the guests give the best feedback to them. Wayne Kang, the ACE Biotek US Office Representative, says that Wallie Screen and O-Ring can be considered the conventional equipment in both the pandemic and reopening. To ensure business continuity, employee health, and large-scale events take place, ACE Biotek put effort into providing the best epidemic control solutions for Americans and the Taiwanese.
